

# FUELITE

**OTHER NAMES:** Pegasol AA (Mobil) Britolite (BP) Calite (Caltex)

## DESCRIPTION

Fuelite is a clear colourless solvent with a fast drying rate and negligible residual odour. Ideal for cleaning and degreasing applications, which require fast evaporation of the cleaning solvent. Safe on all metals, some plastics and rubbers. Fuelite is highly flammable.

Sometimes known as clear petrol, and incorrectly referred to as white spirits.

## USES

Fuelite is used as a fuel for gasoline type camp stoves and burner lamps. It is also as a lighter fluid.

## DIRECTIONS FOR USE

### Industrial Applications

Such as preparation of fast-drying inks, diluent for various lacquers and varnish preparations, an extraction medium for perfumes, vegetable oils, fats and glues.

### General Cleaning Solvent

For fast, effective cleaning, degreasing or removing adhesives in areas where a water based cleaner is not desired (eg electrical equipment). Application by spray, wipe or dipping.

## NOTE

Not recommended for dry-cleaning applications as there have been some reports of textile damage.

Solvent X4 is used under the same applications (but should not be used for camp stoves or burner lamps). The main difference is that Solvent X4 evaporates slightly faster than Fuelite.

## PACK SIZES

20 Lt      60Lt      200 Lt      1,000 Lt      Bulk

Refer to Material Safety Data Sheet for handling and first aid instructions.
