

MINERAL TURPENTINE

OTHER NAMES: Turps, High Aromatic White Spirits (HAWS)

DESCRIPTION

Mineral Turpentine is clear colourless petroleum solvent with distinctive odour. Manufactured by the distillation of crude oil. Mineral Turpentine is one of the most common and widely used solvents available. It is more effective at degreasing than white spirit and has a stronger odour due to its higher aromatic hydrocarbon content.

USES

These are just some of the most common uses:

- Degreasing and cleaning solvent especially in engineering and automotive workshops. Use by spray, dip or wipe application.
- In the manufacture of oil based paints and varnishes. Also used as a compatible thinning or clean-up solvent for these coatings.
- Removing tar and bitumen from painted surfaces, metals, some plastics etc.

NOTE

Vegetable Turpentine is a different product, and is not available from Andrew Ltd

PACK SIZES

60 Lt 200 Lt 1,000 Lt Bulk

Refer to Material Safety Data Sheet for handling and first aid instructions.
