

SOLVENT X4

DESCRIPTION

Solvent X4 is a clear, colourless, highly volatile solvent wherever accurate control of drying rate and negligible odour and sulphur content is important.

Contains approximately 50% n-hexane, with a similar content of other hexane isomers.

USES

Solvent X4 is used for extraction of edible oils from seed, fish, perfumes etc. It is also used in the manufacture of adhesives and pressure sensitive tapes and labels, as a diluent for printing ink, aerosols, rubber proofing and general degreasing and cleaning solvents.

PRECAUTIONS FOR USE

Solvent X4 is a highly flammable solvent and can form explosive mixtures with air. It should be kept away from heat, naked flames and sparks. Electrostatic charges may be generated during handling, eg pumping. In case of fire, carbon dioxide, dry chemical powder, foam, sand or earth should be used, but not water jets. Continuous inhalation of vapour should be avoided. As for all organic solvents, the product may cause irritation to the eyes, mucous membranes and throat; exposure to very high concentration may cause narcosis.

PACK SIZES

20 Lt 141 Kg

Refer to Material Safety Data Sheet for handling and first aid instructions.
